

Poo Bucket

Tips:

Keep the poo as dry as possible.

Sometimes it's hard to poo without weeing but if you can keep it separate this will keep the smell down and make it safer to handle.

Use sawdust, straw, shredded newspaper etc. to absorb spills.

Tape this label to your bucket

This bucket is for poo and toilet paper only.

Instructions for use:

- ① Create a nest at the bottom of your clean, empty bucket with either mulch, sawdust, kitty litter, straw or shredded paper.
- ② After you have finished pooing, cover your poo with a cup of either mulch, sawdust, straw, kitty litter, or soil etc.
- ③ Close the lid and wash your hands for at least 60 seconds.
- ④ This bucket will need to be emptied at least every 3 days.
- ⑤ Empty this bucket into a hole in the ground. The hole needs to be between 50cm and 1m deep. If you can't do this, empty the contents into a bag and put it into a rubbish bin with a secure lid.
- ⑥ Keep this covered and separate from your other rubbish.

Wee Bucket

**After a large earthquake,
don't flush your toilet!**

This bucket is for wee only.

Instructions for use:

- ① Add 2-3cm of water to the bottom of your clean, empty bucket.
- ② Do not put toilet paper in this bucket. Put it in your poo bucket.
- ③ After you have finished, close the lid and wash your hands for at least 60 seconds.
- ④ At the end of each day, dilute your wee with some water and pour it into an unused area of your garden or another green space.
